

What is Claimed is:

1. A stable multiphase emulsion composition, comprising:
  - A.) a continuous phase, comprising:
    - i.) an emulsifying crosslinked siloxane elastomer; and
    - ii.) a solvent for the emulsifying crosslinked siloxane elastomer;
  - B.) at least one discontinuous phase, comprising:
    - i.) solid particleswherein the discontinuous phase has a droplet size distribution range of from about 0.1 microns to about 100 microns and wherein the particles are uniformly distributed on the skin independent of skin topography.
2. The cosmetic composition of Claim 1 wherein said composition further comprises a skin conditioning agent selected from the group consisting exfoliants, emollients and mixtures thereof.
3. The cosmetic composition of Claim 1 wherein said discontinuous phase is selected from the group consisting of polyhydric alcohol, water or mixtures thereof.
4. The cosmetic composition of Claim 3 wherein said polyhydric alcohol is selected from the group consisting of propylene glycol, dipropylene glycol, polypropylene glycol, polyethylene glycol, sorbitol, hydroxypropyl sorbitol, hexylene glycol, glycerin, 1,3-butylen glycol, 1,2,6-hexanetriol, ethoxylated glycerin, propoxylated glycerin and mixtures thereof.
5. The cosmetic composition of Claim 1 wherein said composition further comprises an emulsifier.
6. The cosmetic composition of Claim 5 wherein said emulsifier is polyoxyalkylene copolymer.
7. The cosmetic composition of Claim 6 wherein said polyoxyalkylene copolymer is dimethicone copolyol.

8. The cosmetic composition of Claim 1 wherein said solid is selected from the group consisting of inorganic solid particles, organic solid particles and mixtures thereof.
9. The cosmetic composition of Claim 8 wherein said solid particle is selected from the group consisting of gums, chalk, Fuller's earth, talc, kaolin, iron oxide, mica, sericite, muscovite, phlogopite, synthetic mica, lepidolite, biotite, lithia mica, vermiculite, magnesium carbonate, calcium carbonate, aluminum silicate, starch, smectite clays, alkyl and/or trialkyl aryl ammonium smectites, chemically modified magnesium aluminum silicate, organically modified montmorillonite clay, hydrated aluminum silicate, fumed silica, aluminum starch octenyl succinate barium silicate, calcium silicate, magnesium silicate, strontium silicate, metal tungstate, magnesium, silica alumina, zeolite, barium sulfate, calcined calcium sulfate (calcined gypsum), calcium phosphate, fluorine apatite, hydroxyapatite, ceramic powder, metallic soap, colloidal silicone dioxide, boron nitride; polyamide resin powder, cyclodextrin, polyethylene powder, methyl polymethacrylate powder, polystyrene powder, copolymer powder of styrene and acrylic acid, benzoguanamine resin powder, poly(ethylene tetrafluoride) powder, and carboxyvinyl polymer, cellulose powder, ethylene glycol monostearate; titanium dioxide, zinc oxide, magnesium oxide, interference pigments and mixtures thereof.
10. The cosmetic composition of Claim 1 wherein said composition further comprises a preservative.
11. The cosmetic composition of Claim 10 wherein said preservative is selected from the group consisting of disodium EDTA, phenoxyethanol, methyl paraben, propyl paraben, imidazolidinyl urea, sodium dehydroacetate, para-hydroxybenzoic acid, hydantoin derivatives, propionate salts, quaternary ammonium compounds, benzyl alcohol and mixtures thereof.
12. The cosmetic composition of Claim 1 wherein said composition further comprises fillers.
13. The cosmetic composition of Claim 1 wherein said composition is in the form of a foundation, mascara, concealer, eye liner, brow color, eye shadow, blusher, lip cream, lip gloss, lip paint or lipstick.

14. A cosmetic composition comprising:

- (i) from about 0.1% to about 15% of emulsifying crosslinked siloxane elastomer having an average particle size less than 20 microns;
- (ii) from 10 to 80% of a solvent for the crosslinked siloxane elastomer;
- (iii) optionally, from 0 to 50% of skin conditioning agent; and
- (iv) optionally, from above about 0 to about 95% of water

wherein contain at least about 1% air.
